- Great Shade Tree

TREE CARE GUIDE

Chilean Mesquite tree. A.K.A. the Thornless Mesquite. is popular in the southwest due to its drought-tolerance and fast growth. It has proved itself to be a survivor in the desert and can be found all over southwestern states. It also offers an abundance of shade with its wide canopy reach, which can also be used as a privacy screen. This variety of Mesquite tree offers dark, textured trunks with bright green leaves. It can be grown with single or multiple trunks. It can be planted near pathways or patios and do well near Bougainvillea and Yucca plants.
