CARE

INFORMATION

- Long arching fronds
- Medium sized palm
- Custom grown for our climate
- Full sun

TREE CARE GUIDE

Foxtail Palms are extremely tropical looking. Named after the shape of their fronds. These palms make a splash in any tropical themed landscape. They can be planted in full sun with adequate watering. Trimming is very easy and older fronds can be snipped and skins removed by hand to give a neat clean look to your palm. Following the fertilization schedule below will help to keep your palms growing strong and healthy all year long.
