

# KENTIA PALM

## WATER

## SUN

## CARE

## INFORMATION

- Small to medium palm
- Easy to grow in different soils
- Custom grown for our climate
- Clean, easy care

## TREE CARE GUIDE

Kentia Palms are beautiful smaller sized palms and don't require much work to make them look great. These should be fertilized regularly like all palms to keep them healthy and growing strong. We recommend following the schedule below for best results. Deep watering works best, water to a depth of at least 3' each time. Plant in full sun, planting near windows or patios will give filtered shade as well. Trimming is only required when the outer fronds begin to die off and new fronds take over from the heart of the palm.

## FERTILIZER SCHEDULE
