CARE

INFORMATION

- Large arching fronds
- Medium sized tree
- Custom grown for our climate
- Full sun

TREE CARE GUIDE

The King Kong Fishtail Palms are extremely unique in their appearance. Regular watering for this tropical palm keeps them green and growing healthy. Pruning should only be done once new growth takes over from the heart and older outside growth begins to weep or brown. You can also have the trunk shaved to create a clean cigar style cut. These palms should be fertilized regularly to keep the roots strong and encourage vigorous outer growth
