INFORMATION

- Moderate growth rate
- Custom grown for our climate
- Medium sized palm
- Clean, easy care

TREE CARE GUIDE

The King Palm, a Moon Valley Nurseries exclusive, are beautiful focal point palms and don't require much work to make them look great. These should be fertilized regularly like all palms to keep them healthy and growing strong. Deep watering works best, water to a depth of at least 3' each time. This goes for all other palms as well. Creating a water reservoir for them to pull from during the heat of the day. Trimming is minimal and these palms will clean themselves by shedding old growth. Occasionally using a pole trimmer to remove larger branches.
