INFORMATION

- Evergreen shade tree
- Slow to moderate growth
- Extremely hardy
- Clean

TREE CARE GUIDE

Live Oak trees are great shade providers. These trees require little maintenance and are very clean. These trees should be watered to a depth of 36" with each watering. Older, more mature trees should also be deep watered but require less frequent watering. Pruning should be done when needed only. Like all trees, these should be fertilized regularly following the recommended schedule below.

FERTILIZER SCHEDULE
