

MEDITERRANEAN FAN PALM

WATER

SUN

CARE

INFORMATION

- Slow growing palm
- Custom grown for our climate
- Extremely hardy, cold & heat
- Minimal maintenance

TREE CARE GUIDE

Mediterranean Fan Palms require little in the way of regular maintenance. These are hardy water-wise palms that become drought tolerant once established. Being slower growing they require minimal pruning and is easy for a homeowner to do without paying a gardener. Fertilize regularly to create strong healthy root systems and to promote strong outer growth. These trees should be watered to a depth of 36" each time they are watered to give them what they need throughout the day.
