

# MEXICAN BLUE PALM

## WATER

## SUN

## CARE

## INFORMATION

- Blue fan shaped fronds
- Slow growing
- Cold & heat hardy palm
- Full sun

## TREE CARE GUIDE

Mexican Blue Palms are unique and easy to grow. These are slower growing medium sized palms. Once established these trees are drought tolerant and extremely hardy. Water to a depth of 36" each watering saturating the entire root ball out to the edge of the fronds. Trimming should happen once older fronds begin to weep below the heart of the palm. Fertilizing schedule below should be followed for optimal growth and health of the tree.
