INFORMATION

- Fan shaped fronds
- Dwarf palm
- Cold & heat hardy palm
- Full sun

TREE CARE GUIDE

Windmill palms are slow growing dwarf palms that require little work. These are hardy drought tolerant palms once established. These require little pruning and can easily be done with garden shears. You can also skin these palms for a cleaner looking trunk. For best growth results follow the fertilizing schedule below. When watering always water to a depth of 36" to ensure the palm has water to pull from during the heat of the day.

FERTILIZER SCHEDULE

PRODUCT	JANUARY	FEBRUARY	MARCH	APRIL	MAY	JUNE	JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER
