

# HOPSEED

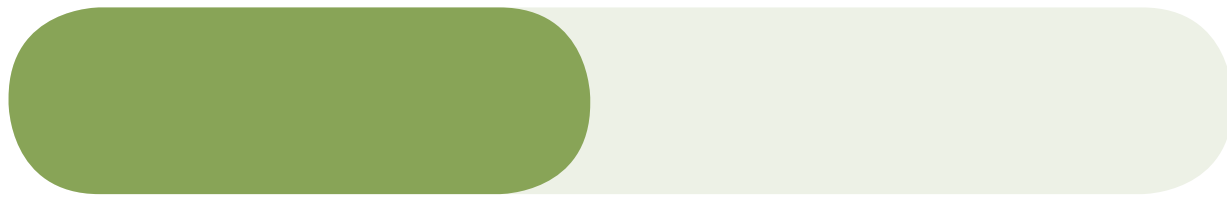

## WATER

## SUN

## CARE

## INFORMATION

- Fast Growing
- Evergreen
- Great Hedge
- Low Water

## TREE CARE GUIDE

Hopseed love to grow in a location with plenty of full sun exposure. Plant them in a spot that gets at least six hours of direct sunlight each day. These plants can take any kind of soil, ocean winds, and dry desert heat. Use them as a tall narrow screen, hedge, or as a colorful filler plant in the yard. Homeowners in hot climates take note – when planted as a tightly spaced hedge, they can provide shelter from desert winds. You can also plant them in a lovely container and mix them with draping plants.

## FERTILIZER SCHEDULE

JANUARY

JUNE/JULY

DECEMBER

MARCH/APRIL

SEPTEMBER/OCTOBER

FROM OUR FARMS TO YOUR YARD
