CARE

INFORMATION

- Fast Growing
- Evergreen
- Great Hedge
- Classic Mediterranean Style

TREE CARE GUIDE

Italian Cypress, botanical name *Cupressus sempervirens* 'Glauca', brings a stately, formal look to any landscape. Native to southern Europe and Western Asia, Italian Cypress trees are an excellent choice for planting in tight areas. Featuring a narrow, columnar form, these evergreen trees are commonly seen planted in rows, lined up along driveways on properties throughout the Southwest, especially in coastal areas. The blue-green foliage adds a classic Mediterranean look to any landscape style. At Moon Valley Nurseries, we feature Italian Cypress tree strains that provide a stronger foliage color versus similar offerings from other growers.
